

MAK D-SCALEX

DESCALER &
RESTORATION FLUID -
MC606

PRODUCT INFORMATION

MAK D-SCALEX is a very effective acid based cleaner designed to remove all calcium deposits, concrete and cement from all acid-resistant surfaces. The product is used in industrial plants such as cement plants, lime kilns, car washes, cleaning agencies and quarries. The product is also intended for cleaning tools and small machinery. Due to the wide range of concentrations, the product can be used for general cleaning in heavy duty operations. **MAK D-SCALEX** at a dilution of **1:5** and above perfectly breaks the bond between the surface and calcium or lime scale deposits on ceramic tiles, tiles or other sanitary products. Due to its composition, which contains surfactants, it reduces the time required to remove mortar, cement and grout residues. **MAK D-SCALEX** is also used for descaling pipes and radiators.

Typical Applications

- Renovation of floors, cleaning of faded surfaces
- Descaling surfaces, pipes and radiators
- Cleaning stone, bricks, cement, marble, paving slabs, tiles etc
- Removal of oxidation, rust and corrosion
- Remove stains

Beneficial Qualities

- Very economical in use – can be mixed with water for most applications
- Does not change its characteristics even under temperature variations
- Works quickly
- Personnel can avoid lengthy chipping and scraping

MAK D-SCALEX

DESCALER & RESTORATION FLUID -
MC606

Technical Details

Appearance / Colour.....Liquid / Yellow
pH (concentrate).....-0.5
Specific gravity (g / l).....1.05
Boiling point.....approximately 100°C

Dilution/Mix Ratio with Water

Heavy pollution 1:5
General use 1:20
Regular cleaning..... 1:50

Instructions for Use

1. Dilute the product according to the Dilution/Mix Ratio Recommendations
2. Apply via hand spray applicator, mop, cloth or brush
3. Leave for a few minutes
4. Wipe or rinse thoroughly with water
5. Repeat if necessary

Product Manufactured in Czech Republic.
